EXP NO:5	Hotel Room Booking Reports in Zoho Creator

Aim

To design reports on the Room_Booking_Form in Zoho Creator using different Report Types so that each user group can view and analyze hotel booking data in a suitable format.

Theory

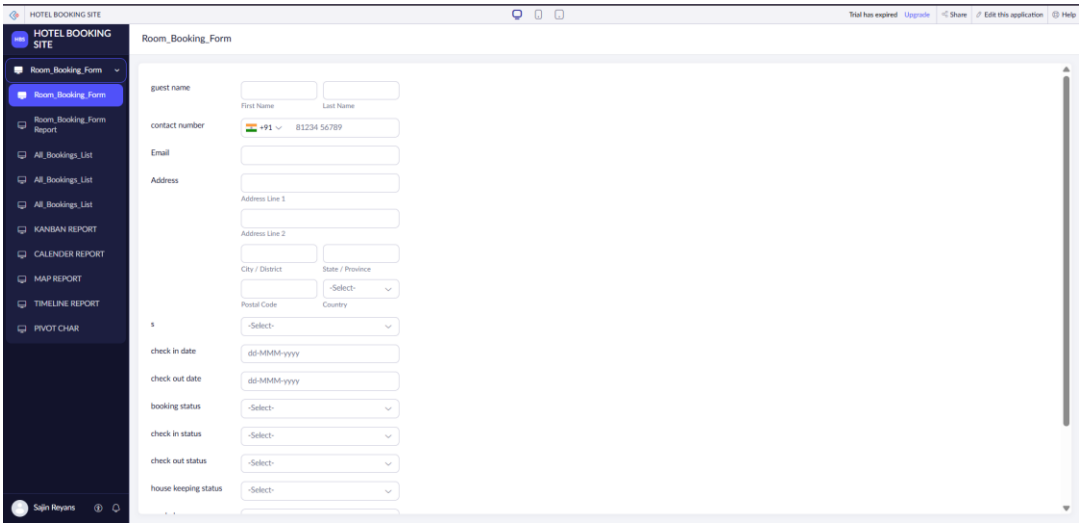

Reports in Zoho Creator present the data captured through a form in different ways. A single default list cannot serve every user, so Zoho Creator provides report types such as List, Spreadsheet, Kanban, Calendar, Map, Timeline and Pivot/Chart views.

The **Room_Booking_Form** stores guest name, contact number, email, address, check-in and check-out dates and booking, check-in, check-out and housekeeping status. Each report below presents this data for a specific purpose.

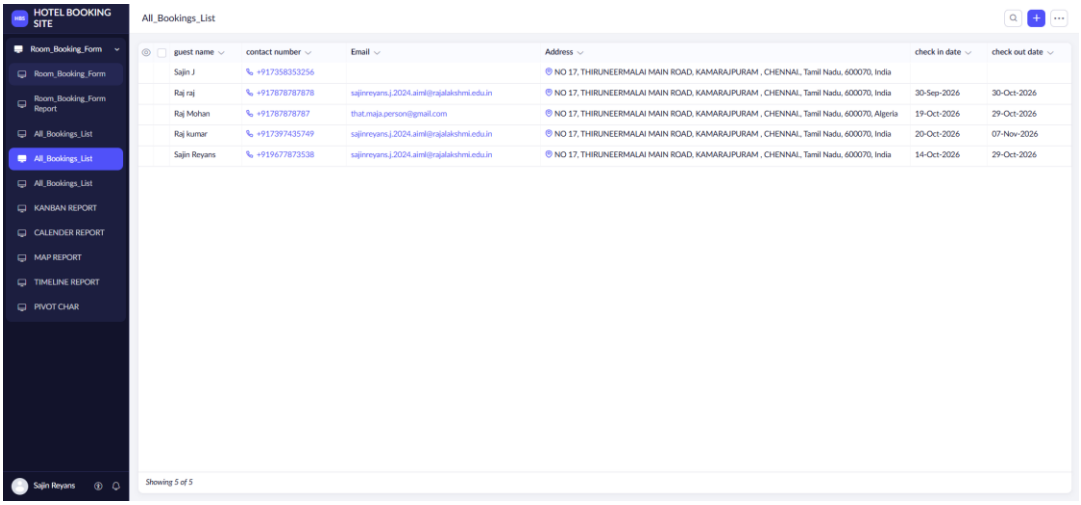

Reports Created

Report Type	Report Name	Purpose
List View	All_Bookings_List	Searchable list of all bookings
Spreadsheet View	All_Bookings_List (grid)	Editable grid to update statuses in bulk
Kanban View	KANBAN REPORT	Cards grouped by booking status
Calendar View	CALENDER REPORT	Bookings shown by date
Map View	MAP REPORT	Guest addresses plotted on a map
Timeline View	TIMELINE REPORT	Bookings along a time axis
Pivot / Chart	PIVOT CHAR	Chart analysis of booking data

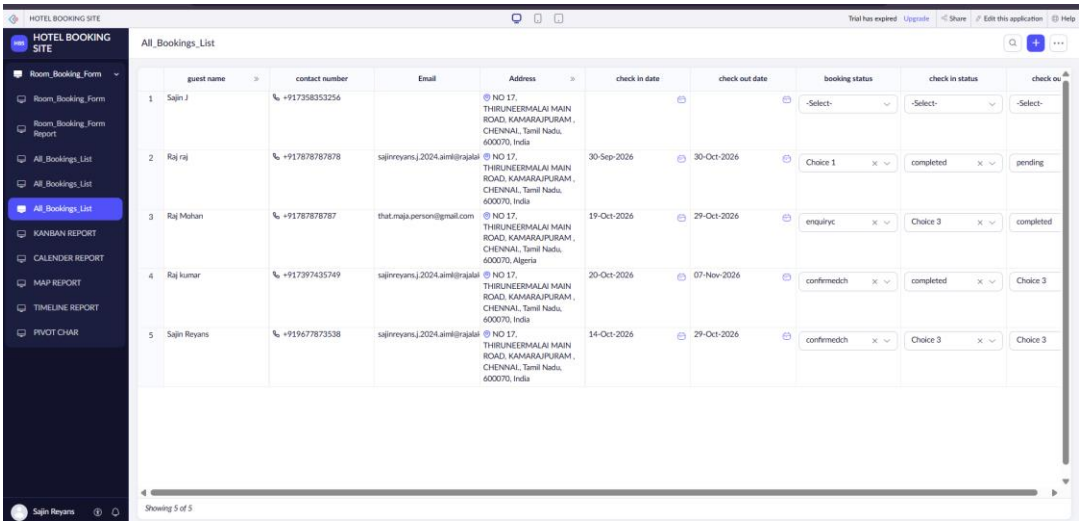

Screenshots

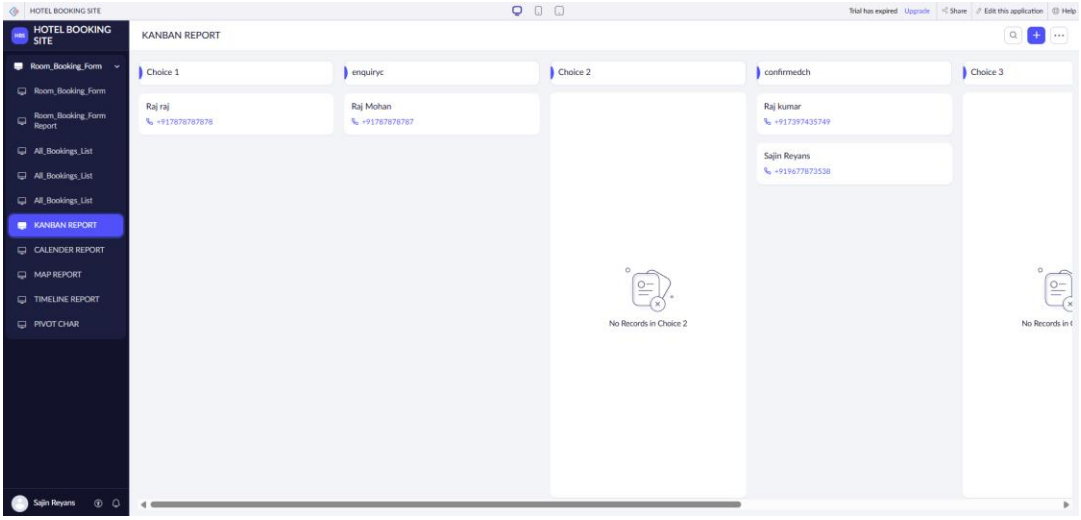

Room_Booking_Form

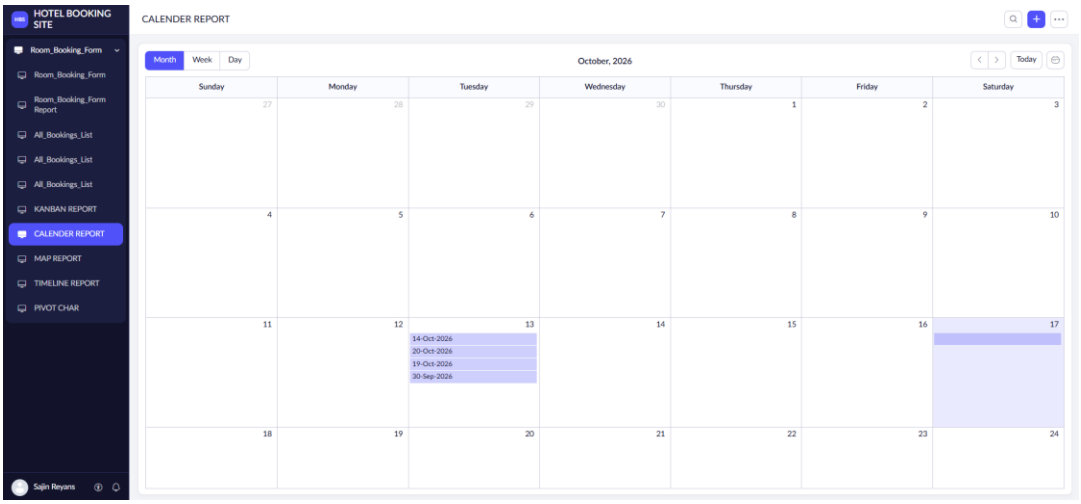

List View – All_Bookings_List

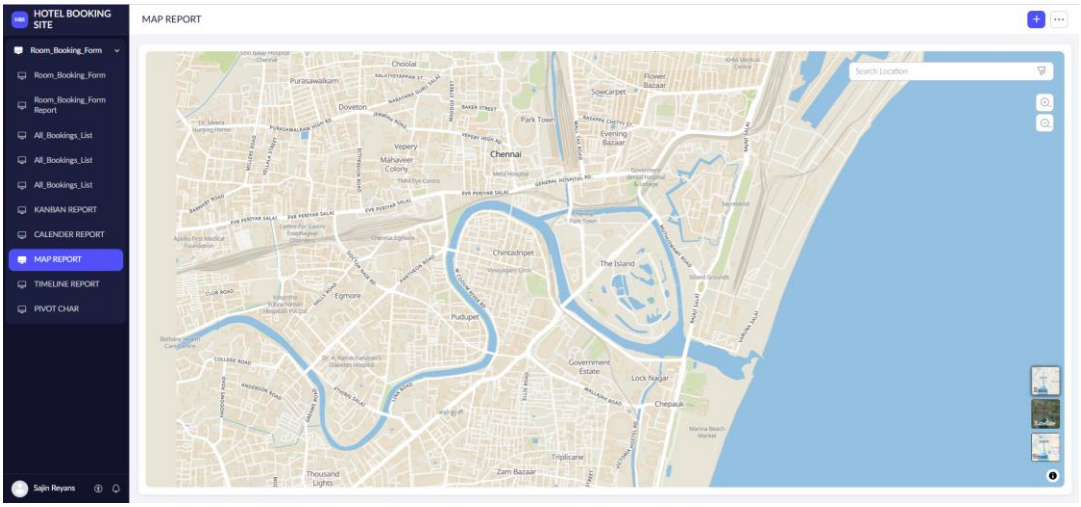

Spreadsheet View – editable status columns

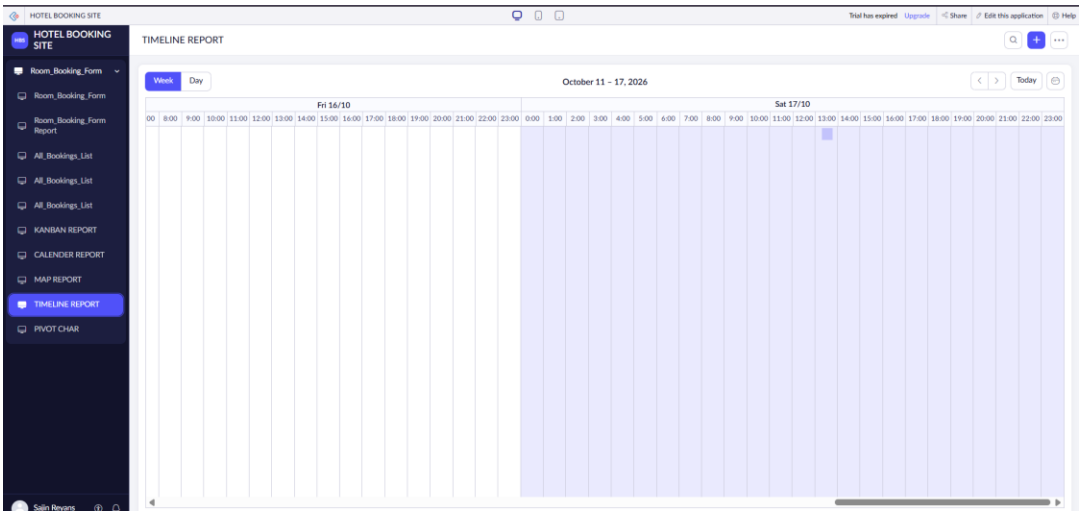

Kanban View – KANBAN REPORT

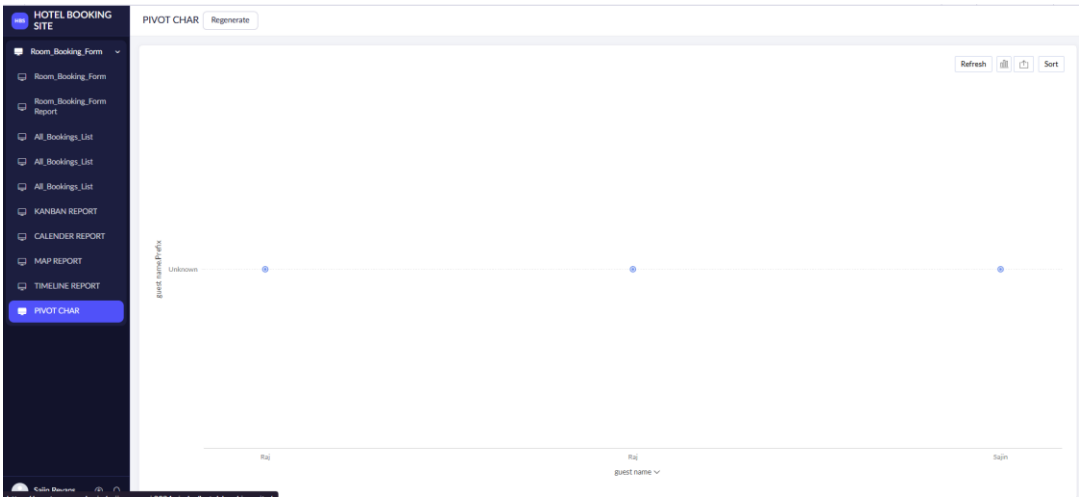

Calendar View – CALENDER REPORT

Map View – MAP REPORT

Timeline View – TIMELINE REPORT

Pivot / Chart – PIVOT CHAR

Result

Thus, reports were created on the Room_Booking_Form in Zoho Creator using the List, Spreadsheet, Kanban, Calendar, Map, Timeline and Pivot/Chart views, giving each user a suitable view of the booking data without writing code.
