EXP 2	Zoho Creator Setup and Platform Exploration

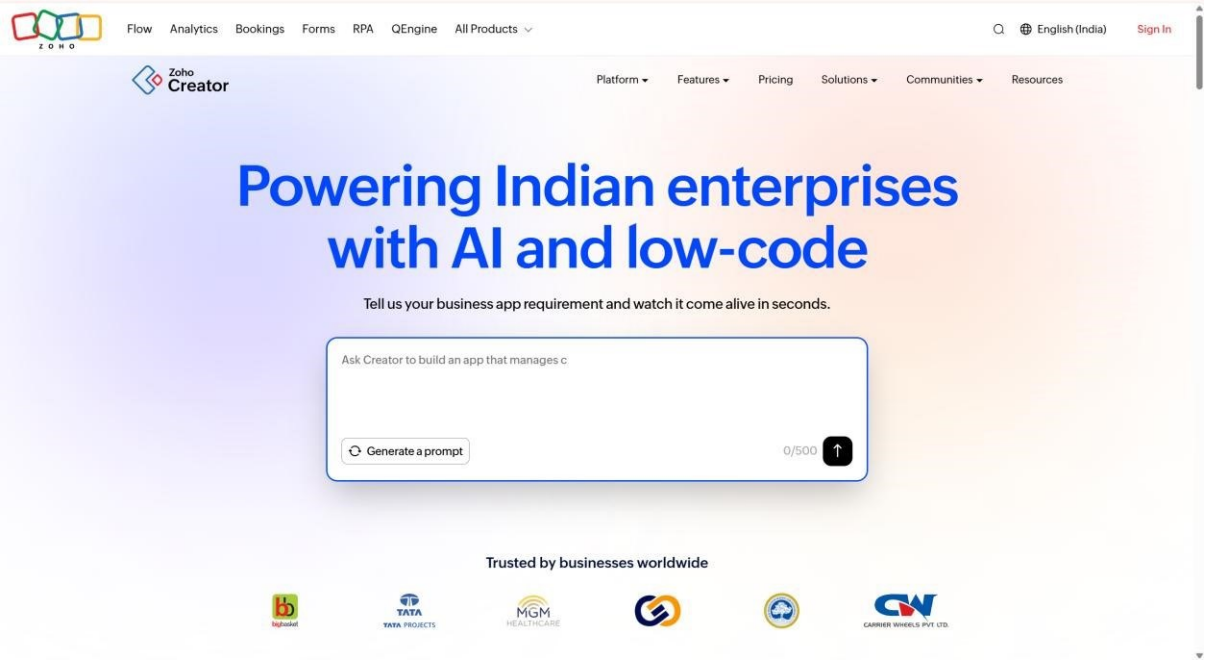

AIM

To explore the features of Zoho Creator and understand how to set up an account, navigate the platform, and create a basic application using its low-code environment.

Procedure:

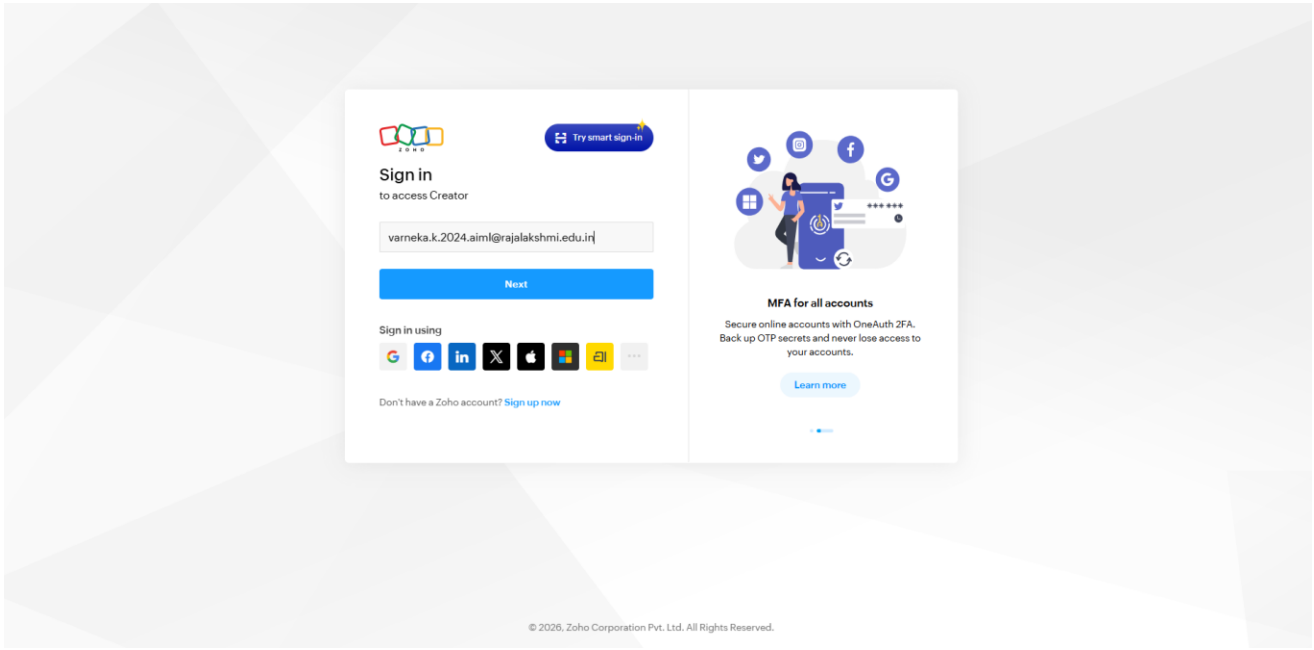

Screenshot 1 – Zoho Creator Homepage

- Open a web browser and navigate to Zoho Creator website
- The homepage is displayed with AI-powered low-code platform features
- Observe the input box to describe application requirements
- Click on Sign In to proceed further

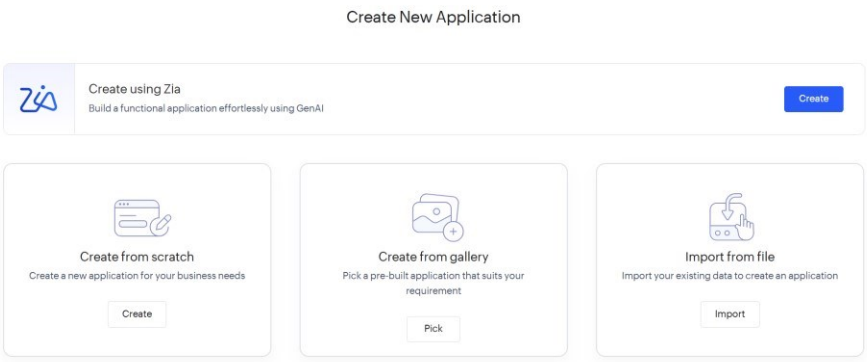

Screenshot 2 – Login Page

- Enter the registered email ID in the login field
- Click on the Next button
- Alternatively, choose any available sign-in option (Google, LinkedIn, etc.)
- Complete authentication to access the platform

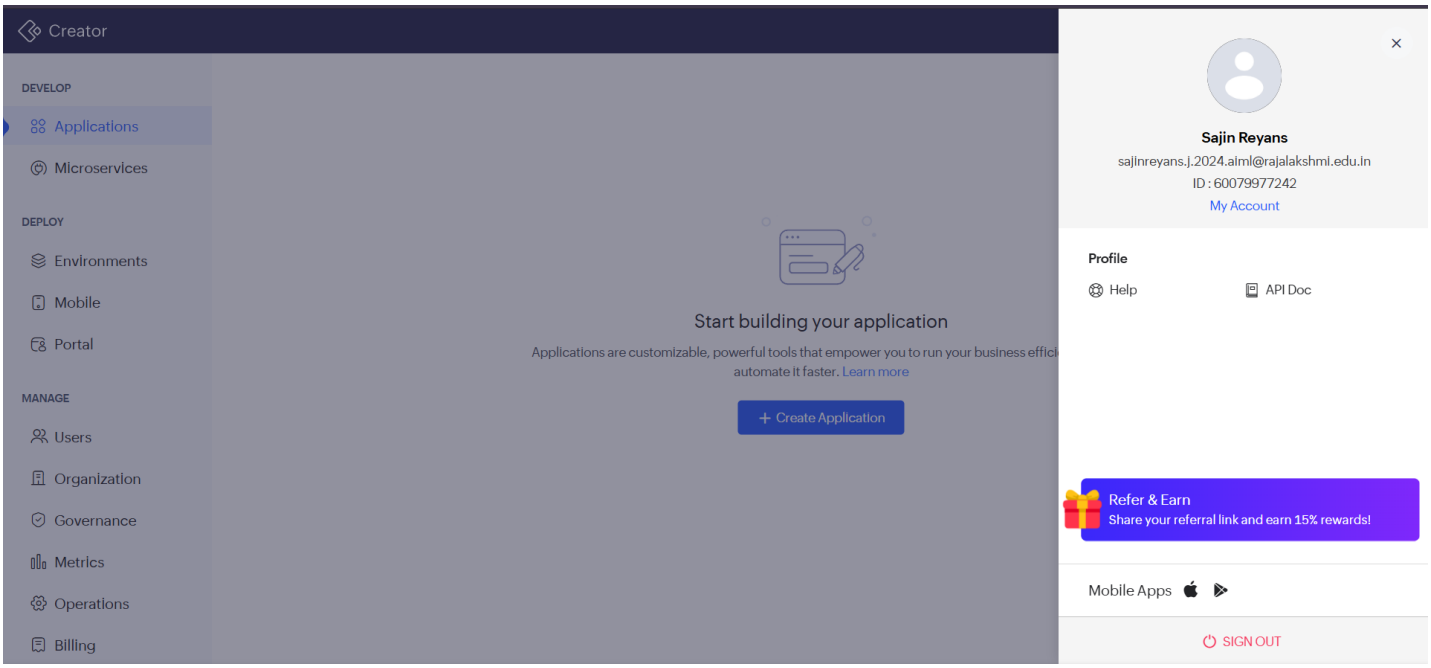

Screenshot 4 – Create New Application

- The "Create New Application" window is displayed
- Select any one option:
- Create using Zia (AI)
- Create from scratch
- Create from gallery
- Import from file
- Click the respective button to proceed with application creation

Screenshot 4 – Dashboard

- After successful login, the dashboard is displayed
- View the existing applications
- Use the left-side panel to navigate through modules like Applications, Users, Metrics, etc.
- Click on Create Application to start building a new app

RESULT:

Zoho Creator platform was successfully explored, and the process of logging in, navigating the dashboard, and creating a new application using its low-code features was understood.
